PROFESSIONAL SUMMARY

Cybersecurity Operations Engineer (B.Tech CSE – Cyber Security, SR University, 2027) with hands-on SOC lab expertise in **SIEM, IDS/IPS, incident response, and threat detection**. Proficient in **Splunk, Wazuh, Microsoft Sentinel, ELK Stack, Snort, Sysmon, and KQL**; skilled in MITRE ATT&CK-mapped detection engineering, log analysis, and NIST-aligned security operations. **Top 1% globally on TryHackMe** (3M+ users). Currently pursuing **CompTIA Security+** to advance enterprise SOC and compliance readiness.

ACHIEVEMENTS & AWARDS

Top 1% on TryHackMe — Ranked in global elite percentile among 3M+ users across SOC, CTF & red-team labs.

Certificate of Appreciation — SR University 2024, outstanding academic performance in B.Tech CSE (Cyber Security)

EXPERIENCE

AI Application Developer Intern | Infosys Springboard Virtual Internship 6.0

Feb 2026 – Mar 2026

Python · Streamlit · Ollama · Mistral 7B · LLM Prompt Engineering · JSON Validation · Git

- Engineered AI banking chatbot (**NovaSecure BankBot**) with **Streamlit** & **Mistral 7B**, achieving **~85% query accuracy** across 50+ banking FAQs.
- Automated response validation via **JSON knowledge library**, cutting irrelevant outputs by **~60%** and enforcing domain-scoped responses.
- Optimized **LLM prompt design** & session state handling, delivering sub-**2-second** streaming responses across **1,000+** simulated interactions.

PROJECTS

VM-Based SOC Lab with Hybrid Cloud Integration

2025

Wazuh SIEM · Snort IDS · ELK Stack · AWS EC2 · Tailscale VPN · Kali Linux · Slack Webhooks

- Architected full SOC lab across **5 VMs** (Kali, Ubuntu, Win10, WinServer 2022, EC2) processing **2,000+ simulated daily security events**.
- Deployed **Wazuh SIEM** & **Snort IDS** with custom correlation rules; achieved **~92% threat detection accuracy** for SSH brute-force & auth-failure scenarios.
- Automated high-severity alerts to **Slack via webhooks** & integrated **ELK Stack** + **AWS EC2** via **Tailscale VPN**, reducing notification lag by **~40%**.

Phishing-Based Incident Response & Data Exfiltration Simulation

2025

Splunk · Sysmon · Python · MITRE ATT&CK · Reverse Shell · Host Forensics · Incident Response

- Executed full kill-chain simulation: spear-phishing → **reverse shell** → lateral movement → data exfiltration → anti-forensic deletion across controlled lab.
- Deployed **Sysmon** with **50+ custom rules**; forwarded all telemetry into **Splunk**, reconstructing precise attack timeline via parent-child process analysis.
- Documented remediation playbook — attachment sandboxing, **behavior-based SIEM detections**, automated containment — reducing MTTD gap by **~35%**.

Sentinel AI-Powered SOC (Cloud-Native SIEM/SOAR)

2025

Microsoft Sentinel · KQL · Azure Logic Apps · OpenAI GPT-3.5 · UEBA · MITRE ATT&CK · Azure Managed Identity

- Architected cloud-native **SIEM/SOAR** on **Microsoft Sentinel** ingesting **10GB+** daily logs; engineered **KQL** analytics rules mapped to **MITRE ATT&CK** tactics.
- Built **Azure Logic App** playbook with **OpenAI GPT-3.5** auto-generating AI incident analysis on **Sentinel** alerts within seconds, significantly reducing triage time.
- Enabled **UEBA** behavioural baselines for anomalous sign-ins & Tor exit-node detection; secured pipeline via **Azure Managed Identity** with least-privilege **IAM** roles.

CERTIFICATIONS

Certified Network Security Practitioner (CNSP) — The SecOps Group, Nov 2025 **Microsoft Certified: Azure AI Fundamentals** — Microsoft, 2025

Salesforce AI Associate — Salesforce, 2025 **CompTIA Security+** — In Progress

TECHNICAL SKILLS

SIEM & Monitoring: Splunk, Wazuh, Microsoft Sentinel, ELK Stack, Sysmon, Log Analysis

IDS/IPS & Detection: Snort, Suricata, MITRE ATT&CK, OWASP Top 10, Malware Analysis

Network Security: Wireshark, Nmap, Burp Suite, Firewall Mgmt, TCP/IP, DNS, HTTP/S, VPNs

Incident Response: Host Forensics, NIST Framework, IR Playbooks, Triage, John the Ripper

Scripting & Dev: Python, Bash, C, Git, GitHub, KQL, Azure Logic Apps

Cloud & OS: Azure, AWS EC2, Tailscale VPN, Kali Linux, Ubuntu, Windows Server

ITSM & Collab: Jira, Slack Webhooks, Remote Collab Tools

Soft Skills: Analytical Thinking, Problem-Solving, Communication, Attention to Detail

EDUCATION

B.Tech – Computer Science & Engineering (Cyber Security)

2023 – 2027

SR University, Warangal, Telangana |

Coursework: Network Security, Digital Forensics, Malware Analysis, Ethical Hacking, Cryptography, Cloud Security, OS, IR
